

2011 Ft. Vancouver Sail and Power Squadron Projection

The projection for Ft. Vancouver will be on growth, growth retention and inner squadron involvement. The steps that will be taken to achieve these goals will be from a major push of squadron involvement. The reorganization of a prospective, new, and established member calling committee will make a big difference in what perspective and new members view looking at FVSPS. It will be the commitment of this committee to follow up with these people to find the likes and dislikes so adjustments can be made as time moves forward. Fort Vancouver is going to continue the community's awareness of the major role USPS stands for in water safety and education by continuing our seminars and presenting Navigating the Northwest again this year. We will continue to install printed material into businesses for the public to read and take.

Rick Gilbertson, AP
Commander, Ft. Vancouver
